

1. Write a PHP program to display current date and time and display Good Morning / Good Afternoon / Good Evening message according to current time.

✓ What this program does

- Sets time zone to **Asia/Kolkata** (change if needed)
- Fetches:
 - Current **date**
 - Current **time**
 - Current **hour (0–23)**
- Uses **if–else** to decide the greeting

Time Range Message

00 – 11	Good Morning
12 – 16	Good Afternoon
17 – 23	Good Evening

```
<?php
date_default_timezone_set("Asia/Kolkata"); // Set your timezone

// Get current date and time
$currentDate = date("d-m-Y");
$currentTime = date("h:i:s A");
$currentHour = date("H");

// Display date and time
echo "Current Date: " . $currentDate . "<br>";
echo "Current Time: " . $currentTime . "<br>";

// Display greeting based on time
if ($currentHour < 12)
{
    echo "Good Morning!";
}
elseif ($currentHour < 17)
{
    echo "Good Afternoon!";
}
else
{
    echo "Good Evening!";
}
?>
```
