

3. Write a PHP Program to perform following operation on Array where values in array are entered by user

- a) Print the values of array.
- b) Reverse an array.
- c) Merge two arrays in sorted manner.
- d) Add values of all elements of an array.

✓ What this program does

a) Print array

Uses `print_r()`

b) Reverse array

Uses:

```
array_reverse($arr1);
```

c) Merge & sort arrays

```
$merged = array_merge($arr1, $arr2);  
sort($merged);
```

d) Sum of array

```
array_sum($arr1);
```

✓ PHP Program (with HTML form)

Save this as array_operations.php

```
<!DOCTYPE html>  
<html>  
<head>  
    <title>Array Operations</title>  
</head>  
<body>  
  
<h2>Array Operations</h2>  
  
<form method="post">  
    <label>Enter values for Array 1 (comma separated):</label><br>  
    <input type="text" name="array1" required><br><br>
```

```

        <label>Enter values for Array 2 (comma separated):</label><br>
        <input type="text" name="array2" required><br><br>

        <input type="submit" value="Submit">
    </form>

    <hr>

    <?php
    if ($_SERVER["REQUEST_METHOD"] == "POST") {

        // Read arrays from user
        $arr1 = explode(",", $_POST["array1"]);
        $arr2 = explode(",", $_POST["array2"]);

        // Trim space from values
        $arr1 = array_map('trim', $arr1);
        $arr2 = array_map('trim', $arr2);

        echo "<h3>Results:</h3>";

        // (a) Print the values of array
        echo "<b>Array 1:</b> ";
        print_r($arr1);
        echo "<br><br>";

        echo "<b>Array 2:</b> ";
        print_r($arr2);
        echo "<br><br>";

        // (b) Reverse an array
        echo "<b>Reversed Array 1:</b> ";
        print_r(array_reverse($arr1));
        echo "<br><br>";

        // (c) Merge two arrays in sorted manner
        $merged = array_merge($arr1, $arr2);
        sort($merged);

        echo "<b>Merged & Sorted Array:</b> ";
        print_r($merged);
        echo "<br><br>";

        // (d) Add values of all elements of Array 1
        // Convert to numbers for addition
        $sum = array_sum($arr1);

        echo "<b>Sum of elements of Array 1:</b> $sum<br><br>";
    }
    ?>

</body>
</html>

```
