

6. Write a PHP program to find out maximum and minimum number.

1. Program Using Three Numbers

```
<?php
$num1 = 25;
$num2 = 10;
$num3 = 40;

// Finding Maximum
$max = $num1;
if ($num2 > $max) {
    $max = $num2;
}
if ($num3 > $max) {
    $max = $num3;
}

// Finding Minimum
$min = $num1;
if ($num2 < $min) {
    $min = $num2;
}
if ($num3 < $min) {
    $min = $num3;
}

echo "Maximum Number is: " . $max . "<br>";
echo "Minimum Number is: " . $min;
?>
```

2. Program Using PHP Built-in Functions (Easier Method)

```
<?php
$num1 = 25;
$num2 = 10;
$num3 = 40;

$maximum = max($num1, $num2, $num3);
$minimum = min($num1, $num2, $num3);

echo "Maximum Number is: " . $maximum . "<br>";
echo "Minimum Number is: " . $minimum;
?>
```
