

MATHS - Unit 4

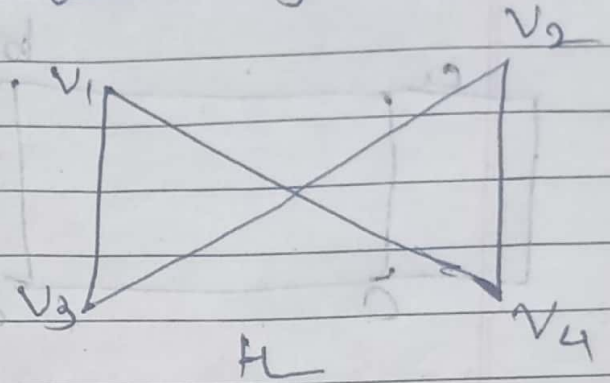

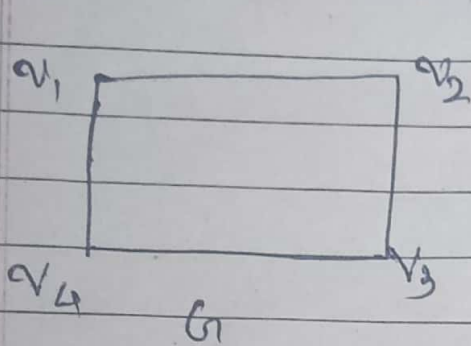

1. What is Graph? Explain the types of Graph.

2. What are the degree of the vertices of graph G?

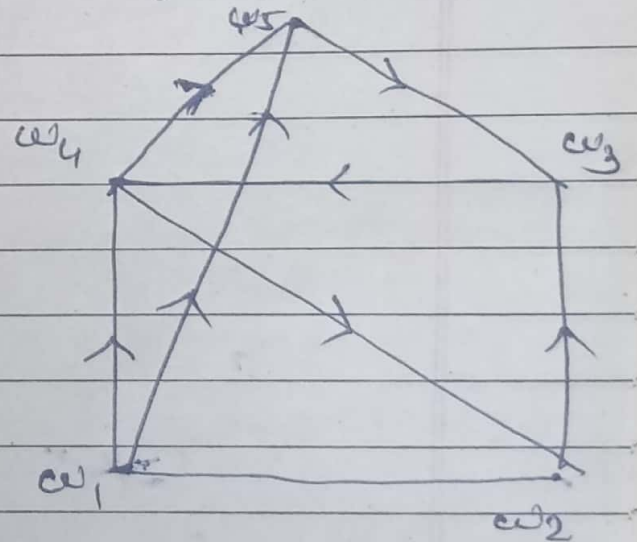

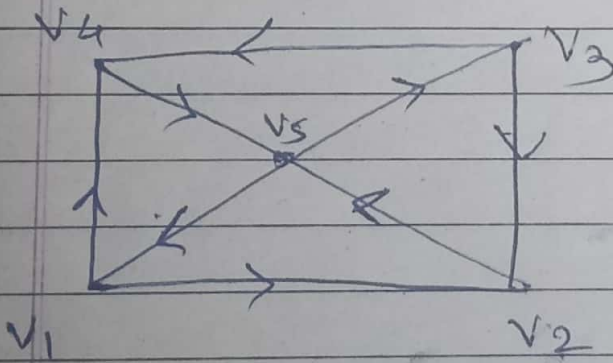

3. Explain the Handshaking Theorem.

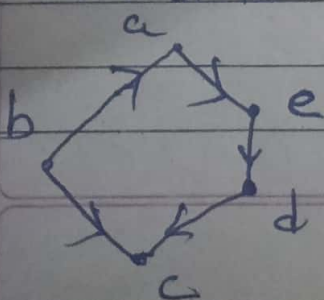

4. Find the function $f: G \rightarrow H$ such that f is isomorphism from graph G to graph H for given below graphs.

5. Show that the digraphs given below are isomorphic.

6. Find the in degree, out degree, and total degree in graph

7. Find vertices, edges, Parallel edges, loops and degree of vertices from the graph.
