

## Experiment:2: Design and style a product showcase using CSS.

---

 **Aim:** To design a simple product showcase webpage using HTML and CSS that highlights products with attractive styling and layout.

---

### Theory

**HTML (HyperText Markup Language):** Provides the structure of the webpage, defining elements like headings, paragraphs, images, and links.

- **CSS (Cascading Style Sheets):** Used to style HTML elements, control layout, colors, fonts, spacing, and responsiveness.
- **Product Showcase:** A section of a webpage designed to display products in a visually appealing way, often using cards, grids, or flexbox layouts.

Using CSS, we can:

- Apply **background colors** and **fonts** for better readability.
  - Use **box-shadow**, **border-radius** for modern card designs.
  - Arrange products in a **grid or flexbox layout** for neat alignment.
- 

### Code:

```
<!DOCTYPE html>
<html>
<head>
  <title>Product Showcase</title>
  <style>
    body {
      font-family: Arial, sans-serif;
      background-color: #f4f4f4;
      margin: 0;
      padding: 20px;
    }
    h1 {
      text-align: center;
      color: #333;
    }
    .container {
      display: flex;
      justify-content: space-around;
      flex-wrap: wrap;
    }
  </style>
